

Which physics map drove the decision? Integrated gradients on the Figure-1 scenario

scenario ch4t-test-001811 (8 masts) · red = toward the predicted cell, blue = away · zero-map baseline, 50 midpoint steps · completeness |error| 0.001 nats

Source evidence
 $\Sigma \text{IG} = +1.88$

Sensor visibility
 $\Sigma \text{IG} = +1.35$

Wind-error sensitivity
 $\Sigma \text{IG} = 0.00$

Fit quality
 $\Sigma \text{IG} = +0.49$
